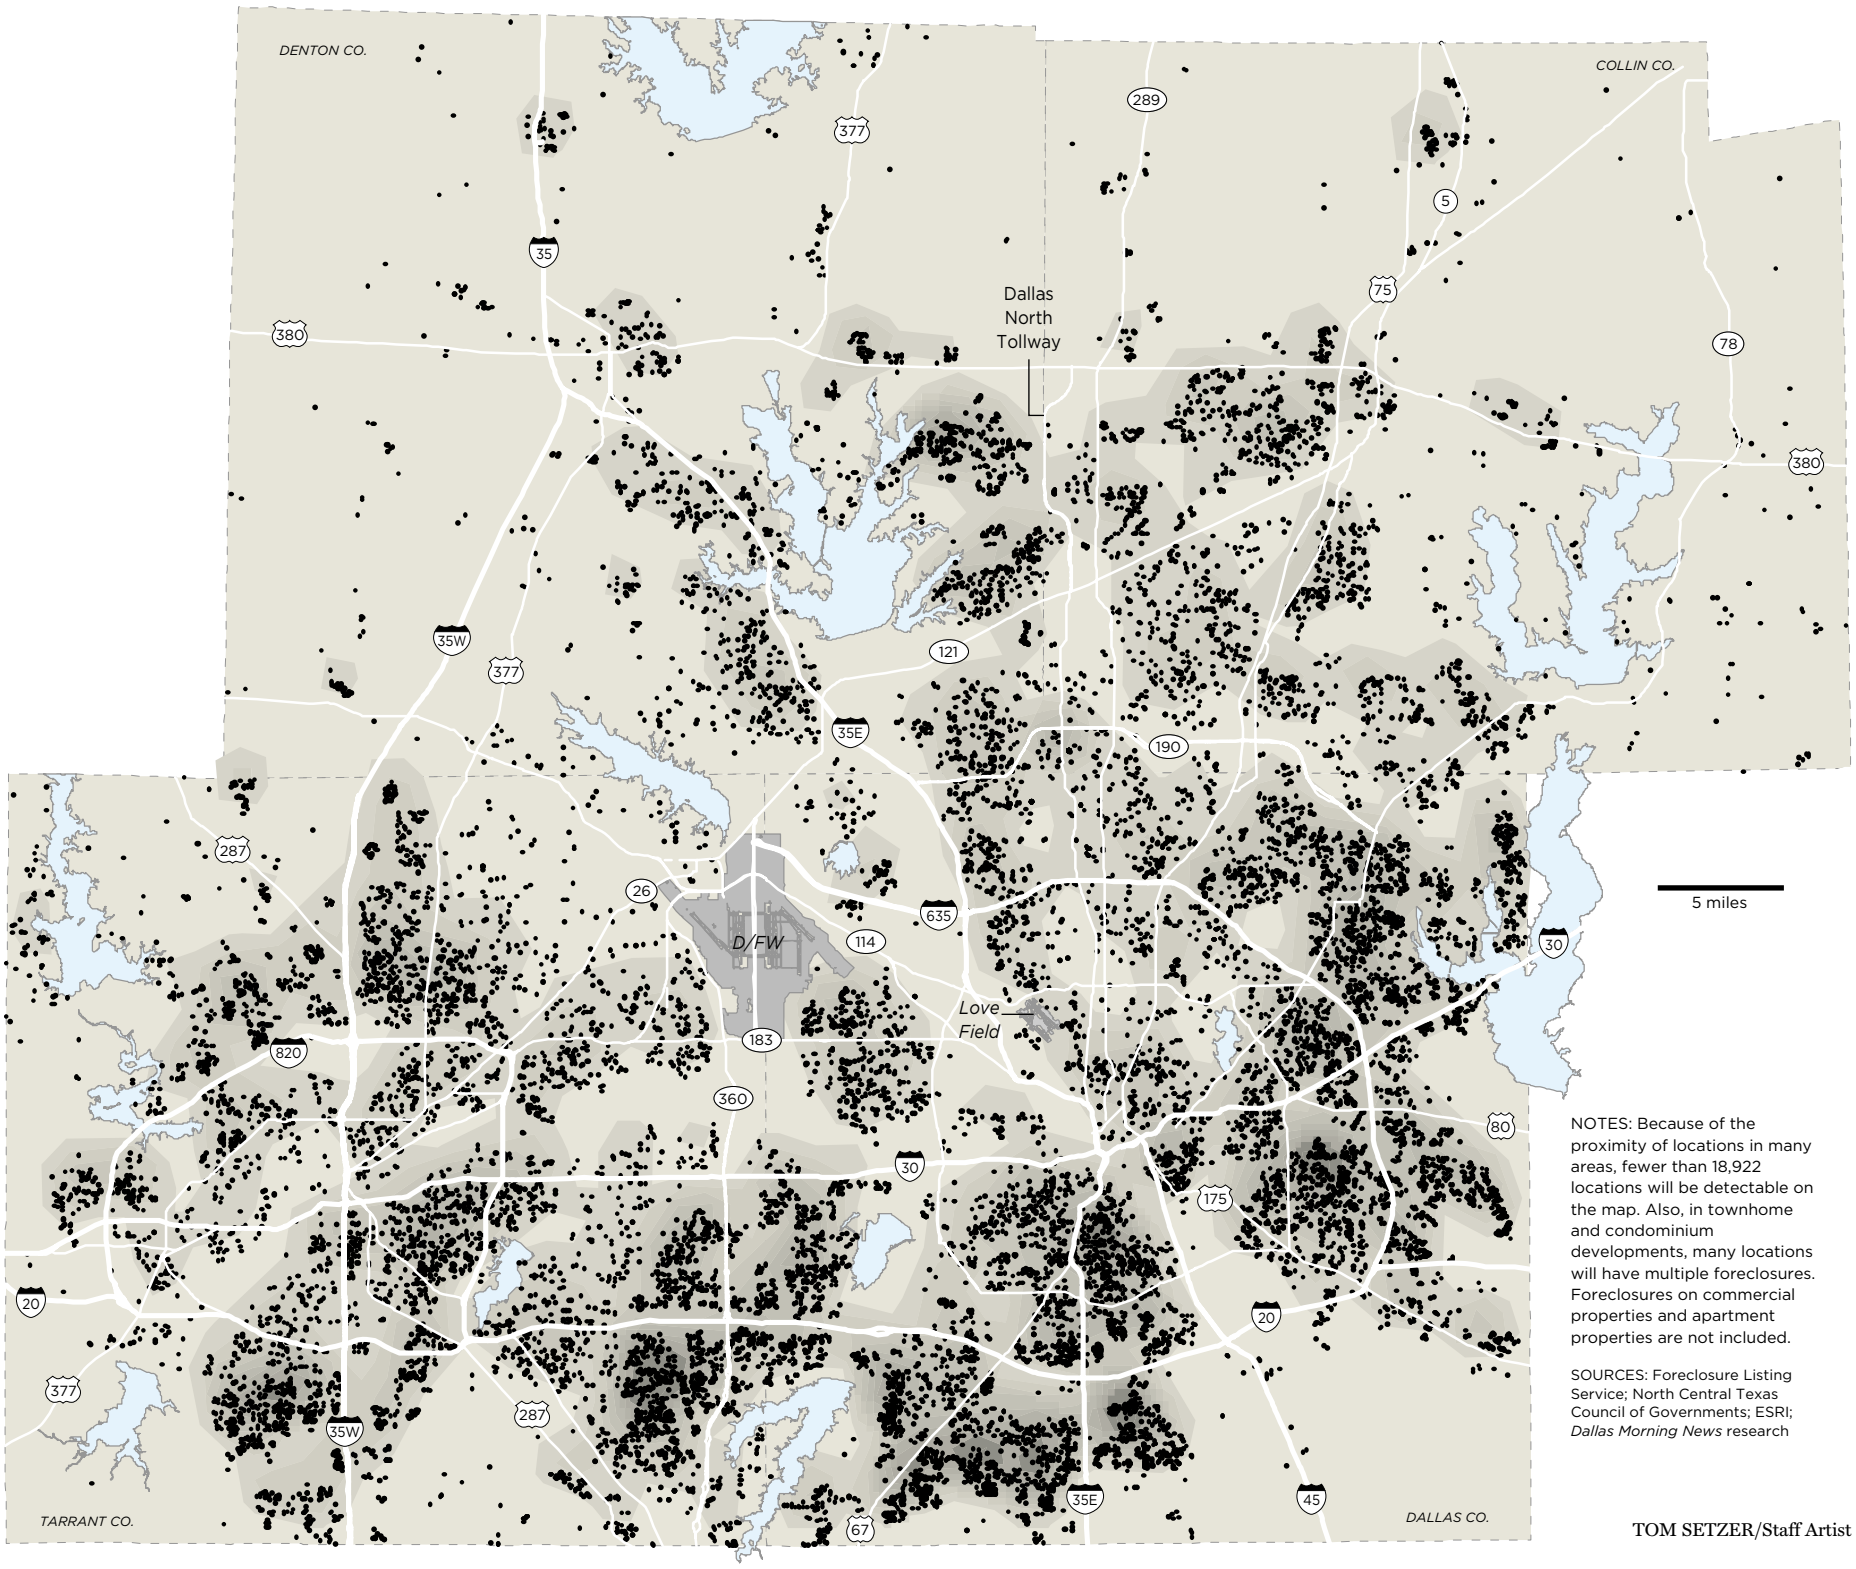
D-FW FORECLOSURES IN 2007

Here's a look at residential foreclosure locations in the four-county area. There were 19,102 residential foreclosures last year. Of those, 18,922, or 99.1 percent, are shown on the map below as black dots. Because of insufficent information, 180 locations, or 0.9 percent, could not be mapped. Areas with darker backgrounds indicate locations where foreclosures are densely clustered.



NOTES: Because of the proximity of locations in many areas, fewer than 18,922 locations will be detectable on the map. Also, in townhome and condominium developments, many locations will have multiple foreclosures. Foreclosures on commercial properties and apartment properties are not included.
